

Keeping up with Expectations of Electrotech's Workplace

MARCH 18TH 3:00 PM

Like many others, the field of automated electromechanic systems is evolving rapidly! The approach to maintenance, system diagnostics, or repair is now radically different. Can educators rely only on documentation from the Ministry of Education? This Voc Talk Café will be an opportunity to examine the experience of the Rosemount Technology Center in Montreal, compare it with your own experience, and perhaps open up new perspectives.

Every Monday at 3:00 PM, the Voc Talk Café focuses on a specific trade sector but remains open to all vocational educators. The first 15 minutes are dedicated to information and the next 45 minutes to discussion and exploration.
