

The Shifting Trends in Graphic Design and Printing

MARCH 25TH 3:00 PM

The Communication and Documentation industry has undergone substantial changes due to technological advancements and societal shifts. The era of the Offset Press dominating the field is long gone! The upcoming Voc Talk Café will delve into how educators in Computer Graphics and Printing programs are adapting to these changes. Teachers are invited to participate in a discussion on strategies for staying current with industry needs and keeping students engaged in these evolving disciplines.

Every Monday at 3:00 PM, the Voc Talk Café focuses on a specific trade sector but remains open to all vocational educators. The first 15 minutes are dedicated to information and the next 45 minutes to discussion and exploration.
