

The Impact of Eco Shifts on Woodworking Trades

APRIL 15TH 3:00 PM

Are the cabinetmaking and furniture finishing trades evolving due to concerns about climate change, sustainability, and resource recovery? How is this impacting the traditions of the craft, the strategies of educators, the demands of future employers, and the expectations of students? Join this Voc Talk Café to share your experiences and explore new perspectives.

Every Monday at 3:00 PM, the Voc Talk Café focuses on a specific trade sector but remains open to all vocational educators. The first 15 minutes are dedicated to information and the next 45 minutes to discussion and exploration.
