

# **Digital Open Sandbox**

**Exploration and experimentation with digital tools**

## **Handout Creation 101 with MS Words or Google Docs**

**APRIL 29<sup>TH</sup> 3:00 PM**

Teachers create many documents for students, such as worksheets, process checklists, handouts, etc. Join us for a hands-on activity about some of the features of MS Word and Google Docs that can make it easier to create engaging, clear, relevant, and accessible documents.

Every fifth Monday of the month, the Voc Talk Café changes its formula to focus on exploring a digital tool, in the context of any sector of vocational training. After a short introduction, participants are invited to test and create with the help of the consultants in attendance.
