

We Should Talk About The New Welding Program... No?

MAY 13TH 3:00 PM

What challenges do teachers face because of changes in the program? Do they need to adapt their material or create new resources? Do they need training on the new elements of the competencies? Let's take some time to share our experiences.

Every Monday at 3:00 PM, the Voc Talk Café focuses on a specific trade sector but remains open to all vocational educators. The first 15 minutes are dedicated to information and the next 45 minutes to discussion and exploration.
